2 Schedule Cleaning Timer Setup

- Once the schedule is set up successfully, the robot will work on time every day at the certain time. If the power switch at the side of the robot is turned off, the schedule will be lost and need to be reset.
- When the vacuum is turned on, quickly press the button , it will beep and the signs of "" on the display screen will blink, showing that it has entered the state of schedule setting mode. Press button to switch between hours and minutes. Press button and to adjust the time numbers.
 - When the schedule setting is completed, press button to save the setup.

• Important tips with the V8s

- Do not submerge the water tank and dustbin due to some electronic components involved. Only clean with wet mop.
- Regularly empty the dustbin. Take out the dustbin by pressing the release button. Then open and dump out the trash.
- Regularly clean the side brush and nose wheel. Pull out the side brush and nose wheel with your hand and clean them.
